

Test. Don't guess.

Easy to use DIY Indoor Air Quality test kits for Commercial, Healthcare, Institutional & Residential environments.

We spend over 90% of our time indoors with our work, education and leisure. Don't you think it's time to take a closer look at how indoor air quality (IAQ) impacts your operational and people costs?

Building owners, managers, and other professionals are responsible for providing a healthy and safe indoor environments. Before you can remove allergens and/or pollutants effectively, it is essential to understand if they exist and in what quantity.

Think you have an IAQ issue? Put the power of an industrial hygienist at your fingertips! Test. Don't guess.

Benefits of IAQ Screen Check:

- ✓ Economical IAQ Testing
- ✓ Quick & Easy Do-It-Yourself
- ✓ Identify Indoor Air Contaminants

Visit cehvac.com for additional
IAQ Screen Check kits.

How it Works:

- 1 Select the Appropriate Kit
- 2 Follow the Instructions
- 3 Collect the Sample(s)
- 4 Send it to EDLab

EDLab will conduct analysis and send you an easy to read report within 3-5 business day after receipt of you sample(s). Lab analysis and report is included with the cost of the kit!

Easy Education Purchasing

Now higher education and K-12 can easily procure a comprehensive suite of IAQ and HVAC/Duct system solutions, including IAQ Screen Check Kit, from Carrier Enterprise! IAQ Screen Check provides easy IAQ testing with remediation recommendations designed to meet the needs of your entire team, from facility and maintenance engineers, to risk management and procurement officials. Our specialized approach to problem solving means educational institutions can rely on IAQ Screen Check for world-class building diagnostics, and innovative IAQ services to optimize the health and performance your learning institution.
