

**Can be installed in almost
Any System Ducted or Not!**

Ceiling Mount Installation

Furnace Installation

Ptac Installation

- Installs Directly inside AC Units
- Filterless
- Aerodynamic Design
- Built Tough to Outlast your Air Conditioner
- Zero Replacement Parts
- Ozone & Chemical Free
- Covers up to 2400 CFM (3000 Sq. Ft)
- Low Maintenance
- Consumes Less than 10 Watts of Electricity
- 100% Made in America

BI-POLAR[®]
2400

**Filterless Cold Plasma
Air Purifier**

**The size of a
smart phone
with the power
to purify an
entire home!**

Global Leaders in Air Purification

BI-POLAR[®]
2400

Bi-Polar quickly reduces:

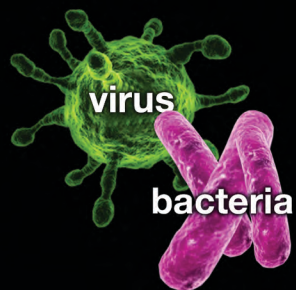

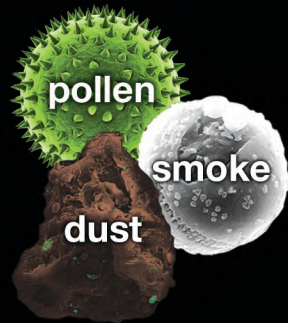

- Mold, bacteria & viruses
- VOCs & odors
- Particulates
- Allergens
- Smoke, pollen & air borne dust
- Static Electricity

Available in 3 Voltages:

- 24 Volt
- 115 Volt
- 220 Volt

BI-POLAR[®]

2400

The Bi-Polar creates cold plasma discharge which consists of positive & negative ions from water vapor in the air. Positive & negative ions attach to particles & allergens such as dust, smoke, pollen & dander. Particles cluster together to create larger particles. Larger heavy particles drop out of the air and are easily trapped in filters.

When the ions land on the outer shell of a mold, bacteria, or virus, DNA/RNA is damaged and the pathogen cannot reproduce.

Positive and negative ions attack odors and harmful VOCs on a molecular level converting them into harmless atmospheric gases, such as oxygen, carbon dioxide and water vapor.

The balance of positive and negative ions neutralize static electricity.

Actual results inside cigar smoke chamber.
