

Fácil Flex - 7.6 Meters

Atco. Working Together.
Doing It Right.

Description:

Fully flexible insulated air duct designed for low-to-medium operating pressures in residential or light commercial HVAC applications.

Construction:

Inner core manufactured from multiple plies of tough polyester (PET) encapsulating a high-carbon spring steel wire helix. The inner core is wrapped with a blanket of pink fiberglass insulation for energy efficiency. The total construction is covered with a durable vapor barrier manufactured from multiple plies of polyester (PET).

Specifications:

Inner Core – 30 microns nominal
Fiberglass Insulation – 25mm nominal
Vapor Barrier – 30 microns nominal
Maximum Positive Pressure –

- 1.5 kPa for diameters 100mm until 250mm
- 1.0 kPa for diameters 305mm and larger

Maximum Negative Pressure – 0.125 kPa
Maximum Air Velocity – 15 m/s
Standard Sizes – 100mm to 500mm
Standard Length – 7.6 meters

Manufactured:

Made in the United States of America.

Packaging:

Product is compression packed in individual cartons for ease of storage and handling and site clean-up.

Use Limitations:

Product is intended for indoor use.
