EVOLUTION®
SYSTEM

The Perfect Air™ Purifier is designed for use in the return air duct of a forced air heating, cooling, and ventilation system. Models GAPABXBB1620, GAPABXBB2020 and GAPABXBB2420 are specifically designed for use in systems with a forced air fan coil and are intended to be powered by 208/230v-60 Hz.

The Perfect Air™ Purifier both captures and kills airborne viruses, bacteria, mold spores, and allergens. It combines superior filtration efficiency MERV 15, with pathogen-killing technology to deliver maximum air purification.

The Perfect Air™ Purifier is designed to require minimal maintenance. Maintenance is limited to the replacement of the air purification cartridge and inspection/brush cleaning of the ionization array. Frequency of air purifier cartridge replacement and cleaning of the ionization array may vary depending on ductwork design and local environmental conditions.

FEATURES/BENEFITS

Performance—Ultra-high efficiency MERV 15. Captures and kills airborne viruses, bacteria, and mold spores.

Simple—Virtually no cleaning required. Simply change purifier cartridge periodically.

Easy to Install—Three distinct cabinet sizes help to ensure a perfect fit to the bottom and side of most Bryant fan coils.

Application Possibilities—Unit can be installed in a horizontal or vertical position, which makes it equally adaptable to horizontal, downflow, or standard upflow applications.

Solid-State Power Supply—Power supply is a highly reliable state-of-the-art, solid-state, high-voltage device.

Durable Cabinet—Heavy-gauge steel cabinet supports up to 400 lb when installed beneath a fan coil.

Agency Listed—Model GAPAB Air Purifier is CSA (Canada and US) listed.

Financing—Eligible for consumer financing program.

1800	--	0.25	0.19
2000	--	--	0.22

NOTE: When applying the GAPAB Perfect Air™ Air Purifier, attention must be given to the duct and system design because all these components affect system static pressure. The GAPAB Perfect Air™ Air Purifier has a higher static pressure drop than the typical factory supplied furnace and/or fan coil filter (as shown above), but is designed to ensure proper system efficiency and reliability when applied to a properly designed duct system and properly sized HVAC equipment.
