Ducted Rebate	Up to \$3000	Up to \$24000	Up to \$13150	\$3,000	up to \$650	The lesser of (\$1.30/sqft ASHP or \$1.65/sqft CCAHSP) or (\$40/MBH ASHP or \$50/MBH CCAHSP)	Up to \$12,000	Up to \$6700	Up to \$1500	Up to \$4500	Up to \$2000		Up to \$22000
Ducted Rebate Criteria	HSPF2-8.5/SEER2-15.2	TBD	SEER ≥ 16; HSPF (Region IV) ≥ 10.00 or SEER2 ≥ 15.20; HSPF2 (Region IV) ≥ 8.50, Variable speed compressor not required	HSPF2 8.2/SEER2 16	96%+ Furnace	Follows GH	Follows GH	COP 1.8+, Capacity maintenance 70%+	Follows GH	Follows GH	COP-1.8+, 15.2+ SEER2, 6.6+ HSPF2		HSPF2 6.6+, SEER2 15.2+, Cap Maintenance 70%+, COP 1.8+, Must be Variable capacity
Ductless Rebate	Up to \$3000	Up to \$24000				The lesser of (\$0.65/sqft ASHP or \$1.00/sqft CCAHSP) or (\$20/MBH ASHP or \$30/MBH CCAHSP)	Up to \$5075	Up to \$6700	\$400 or \$350/head	up to \$2400	Up to \$1200		Up to \$18000
Ductless Rebate Criteria	HSPF2-8.5/SEER2-15.2	TBD				Follows GH	Follows GH	COP 1.8+, Capacity maintenance 70%+	Follows GH	Follows NEEP Criteria	COP-1.8+, 15.2+ SEER2, 6.6+ HSPF2		HSPF2 6.6+, SEER2 15.2+, Cap Maintenance 70%+, COP 1.8+, Must be Variable capacity
List Management	CleanBC, Pulled from NEEP			No list, refer to min. criteria		GH	GH	LogisVert, Pulled from NEEP	Follows GH	Uses NEEP	Efficiency NS-Ducted	Efficiency NS-Ductless	QPA-Oil to Heat Pump list
Update Cycle	Monthly	Monthly	Monthly		Unknown	Follows GH	Follows GH	Twice a year	Follows GH	Follows GH	Follows GH		Quarterly
Conditions	Current primary heat must be NG,propane, or fuel oil provided by FortisBC, BC Hydro, Pacific Northern Gas,Municiple Utility or Oil, wood and Propane not supplied by any of those.	Income Qualified by size of household	It must have the thermostat, outdoor temperature switch-over control or equipment control board set to the following region-specific temperatures for the duration of the product lifetime:Lower Mainland and Vancouver Island regions: ≤5°C, Southern Interior and Northern B.C. regions: ≤2°C	Operated by a single set of controls	Must be installed by SaskEnergy Member or TSASK licensed contractor	Choose a registered Efficiency Manitoba contractor	The HomeEnergySaver program offers incentives to Ontario homeowners with electrically heated homes located in eligible areas to purchase and install a heat pump.	Apply through http://www.logisvert.ca/	Must be on qualifying list	No enrgy audit required	Must have Energy Audit		Must be installed by partipating installer
	Cannot be combined with the CleanBC Better Homes rebate	Assessed value of home over \$1,230,000 automatically level 3	It must be replacing an existing gas furnace that is at least 10 years old.	Connected to a single heat distribution system	Must be a SaskEnergy customer		The heat pump must be properly sized to meet the building heat load requirements and comply with applicable laws, building codes and guidelines, and any additional permitting requirements. This includes any connected ductwork.		Must have an energy evaluation and final evaluation	Point of sale rebates available	Must be installed by Certified RACM		Incentive paid to installer
		Some rebates for electrically heated and wood heated homes only apply to level 1 and 2	It must be a new central ducted air source heat pump integrated with a new compatible high efficiency gas furnace.	Designed, rated and sold together as a single heating system, or combined into a single package and sold together as a single heating system			The heat pump must be capable of operating year-round. Existing electric resistance heating, including electric baseboards or electric furnaces, may be retained as backup heating.		Rental equipment eligible with prior approval	No rebate for leased equipment			

		Level 3 only includes HP rebates switching from gas, propane or oil	It must be installed by a Technical Safety BC licenced gas contractor registered with the Home Performance Contractor Network.				Complete the pre-installation form					
		Cannot be combined with the CleanBC Home Reno rebate	It must be listed as an eligible system on the rebate eligible product list. Qualifying systems must have an AHRI certified reference number that references the outdoor unit and the indoor unit(s) of the heat pump, and the furnace model number.
