

ALERT LABS

FLOWIE + FLOODIE

Intelligent Water Management

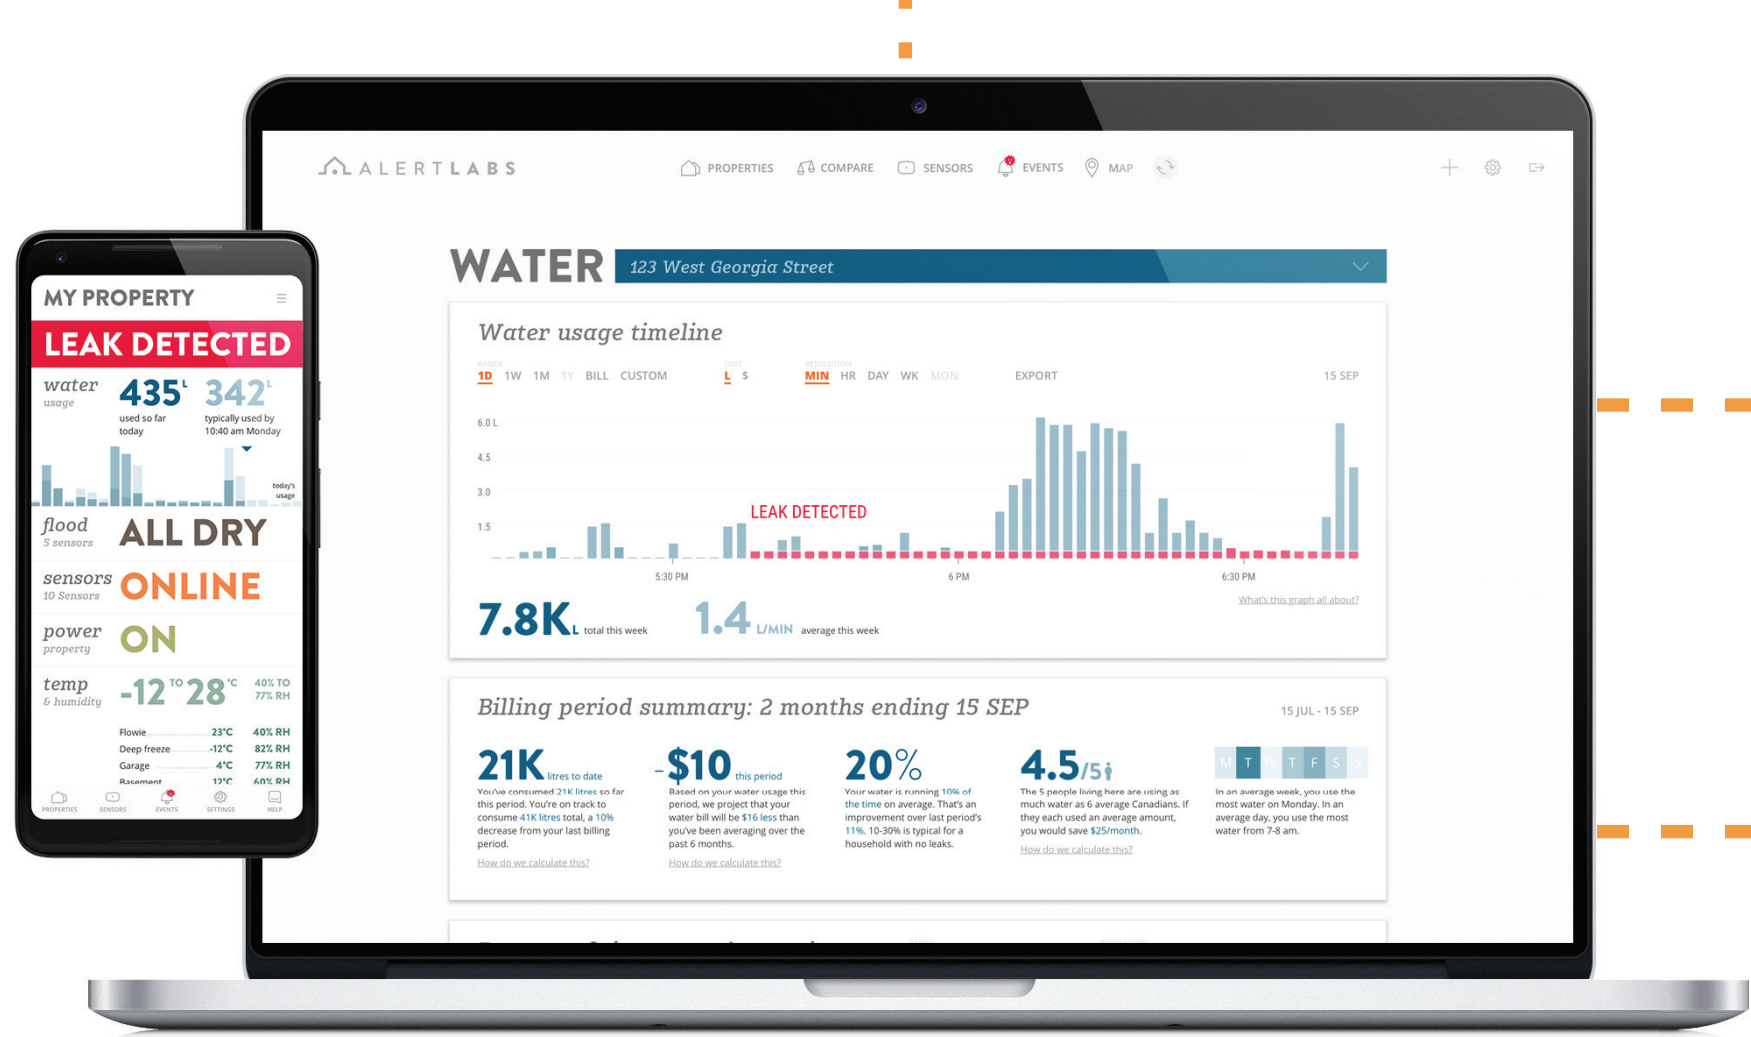

Leak and Flood Detection for Schools

Flowie is the only water flow sensor that straps onto a water meter in seconds for real-time monitoring.

MONITOR ENTIRE CAMPUSES

See water usage alerts and detailed analytics at each school property to focus cost savings

Intelligent Water Management: Helps leak and flood detection. Achieve water conservation and efficiency goals with with real-time monitoring and analytics

Operations Console: Monitor all buildings 24/7 and receive text messages, emails and APP alerts when there is a problem

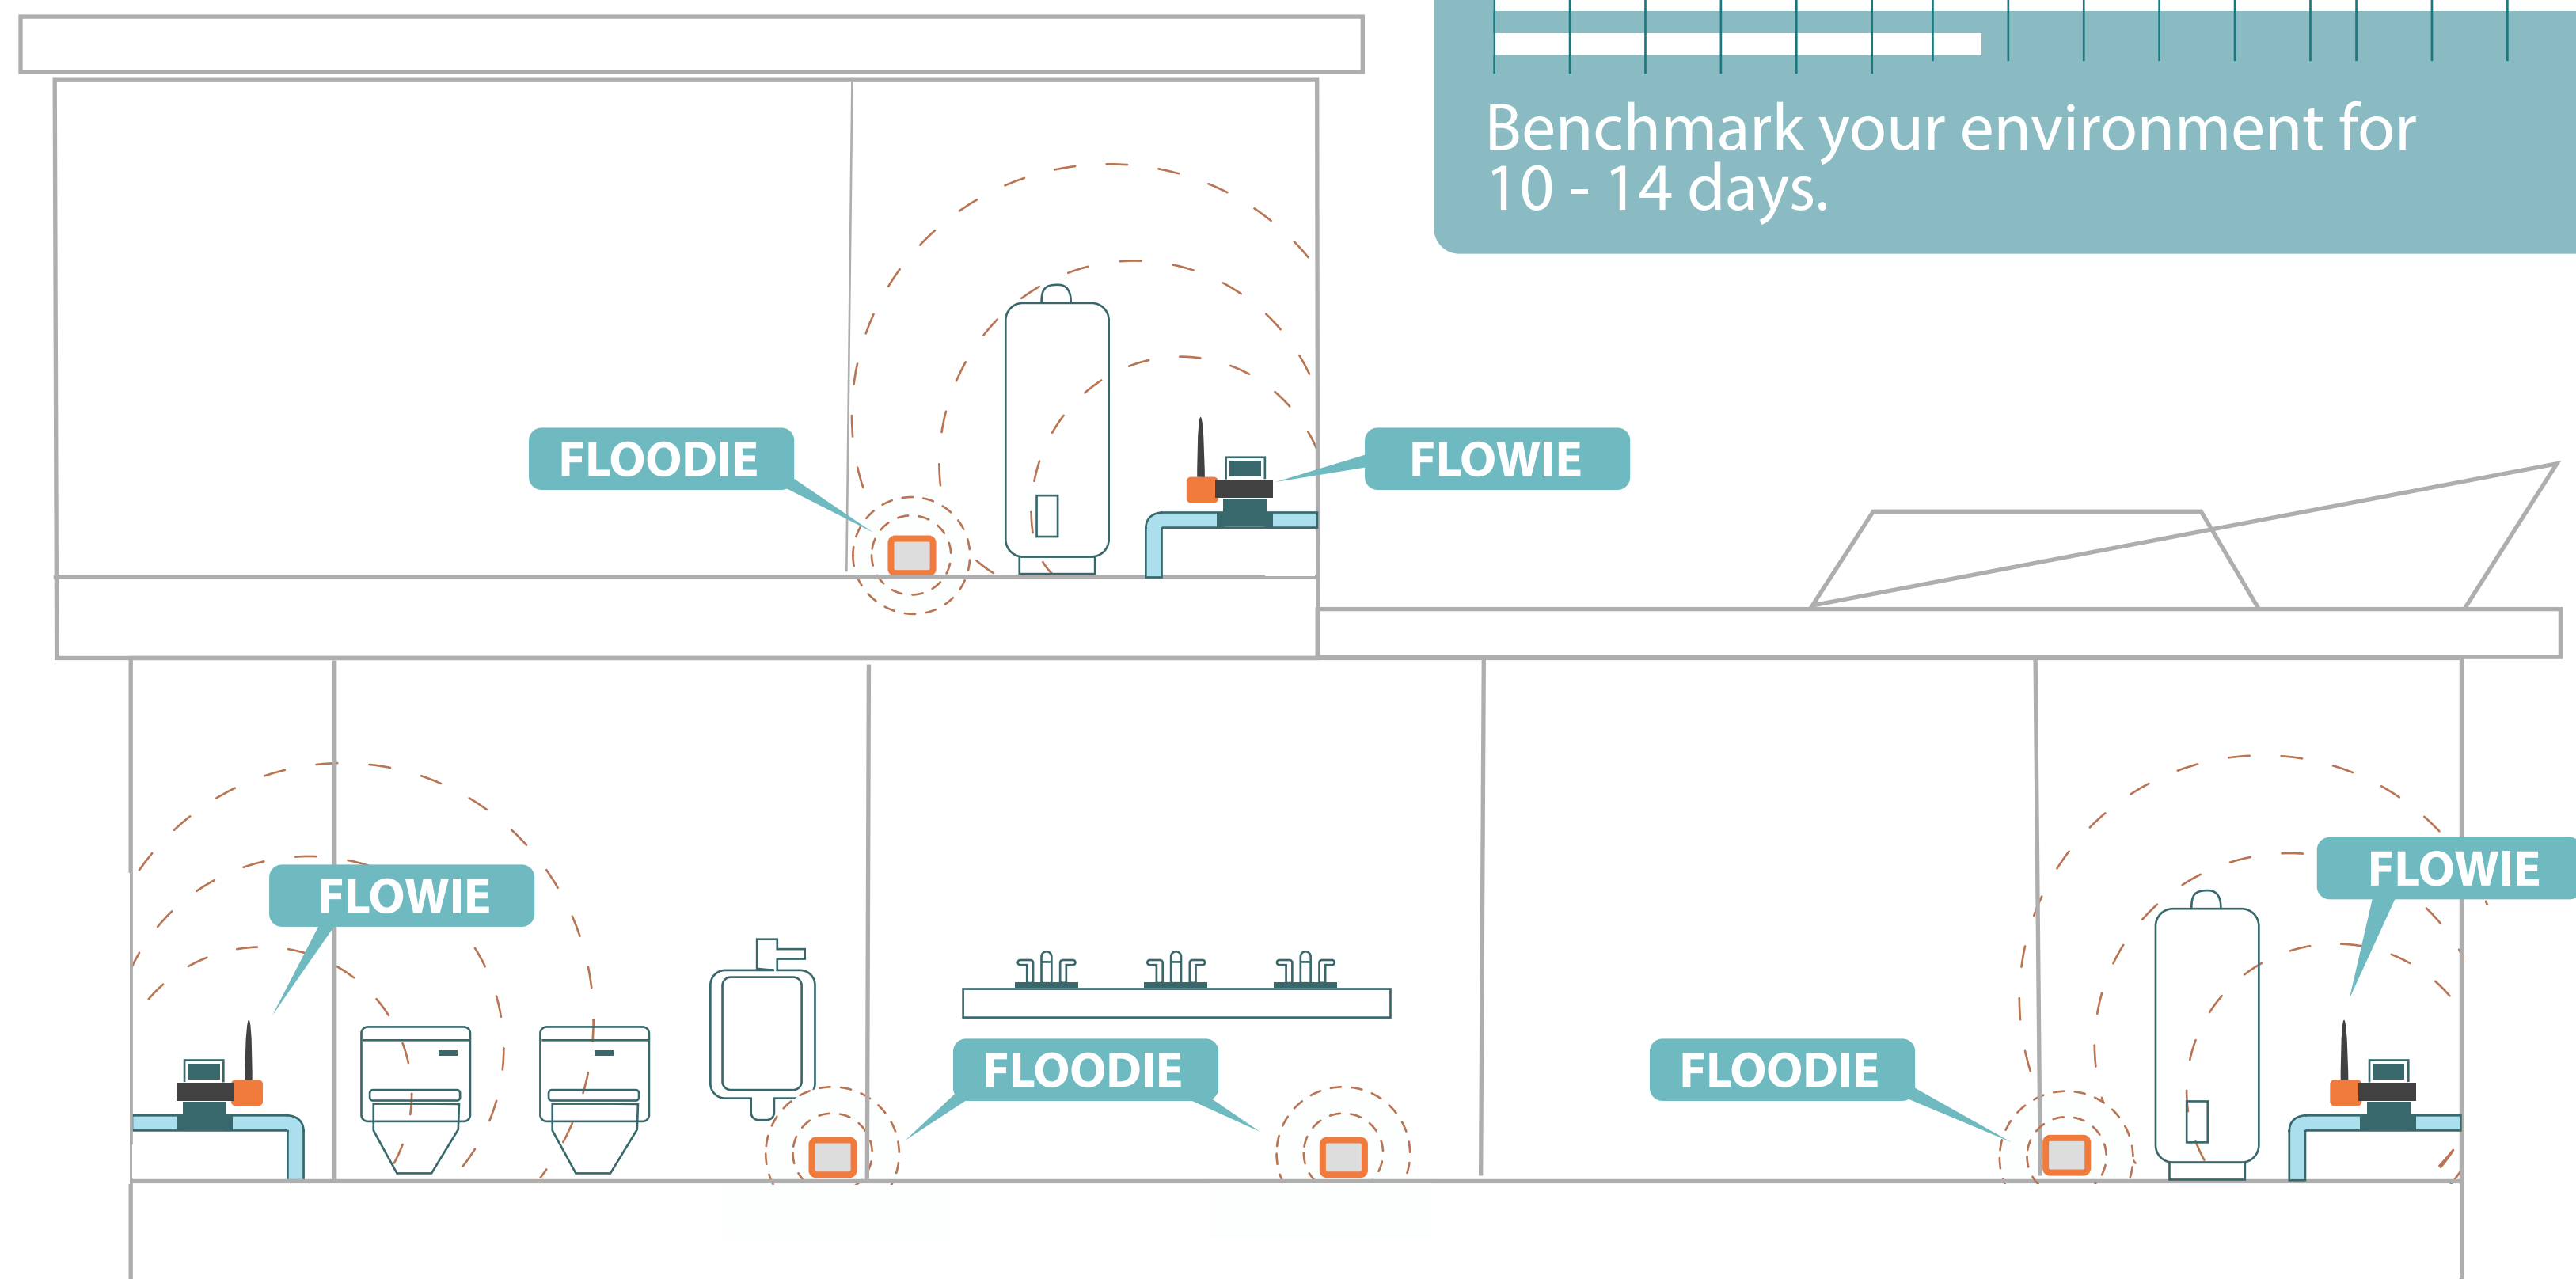

Floodie companion sensor is the most intuitively designed waterproof and reusable flood sensor available.

3 Step Simple Installation Process:

1 **Install Flowie on all meters.**
Calibrate readings and name your devices using Alert Labs Operations Console for 24/7 reporting. Set notifications according to appropriate team members.

Benchmark your consumption, minute by minute in real time.

2 **Install Floodie in area's prone to water leakage.** Cafeteria, pools, pump rooms, ice Makers, basements, water heaters, bathrooms etc.

Name your devices by location and enjoy 24/7 remote monitoring and notification of leaks. Typically completed in 1 day or 5 minutes per device dependent on environment and current infrastructure.

Benchmark your environment for 10 - 14 days.

3 **Validate ROI model working with CE and Alert Labs professionals.**
CE provides a 100% money back satisfaction guarantee in your first 30 days. Reduce water consumption, reduce damage due to floods, lower insurance costs. Teach your students about water conservation.

Analytics

Easy to understand analytics with an APP and dashboard that keep records of events at all buildings

Water Savings

Smarter water savings – 54% of schools tested had ongoing leaks that resulted in 25% increase in water bills

Detect Leaks

Water sensors installed at a school district revealed that 6 out of 7 schools had ongoing leaks.

Quick ROI

Some schools administrators were able to achieve ROI for product purchase in just 17 days
