PROGRAM DETAILS

- Pre-Season orders must be placed by **Friday, October 19, 2018**.
- Placing a minimum \$4,000 Pre-Season order, excluding commodities, on or before Friday, September 21, 2018 guarantees you will receive Pre-Season Pricing levels on all additional orders thru Friday, March 16, 2019. (Note: Pre-Season price will not apply on additional orders of commodity items, ie linesets, copper, black Pipe.) If the minimum purchase criteria is not met, the special Pre-Season price applies only to the Pre-Season order and the competitive Pre-Season Price will be charged on all other orders.
- Price volatility is expected in the coming months due to recently enacted import tariffs and supply shortages in the transportation industry. As a result we anticipated market price increases in the near term and prices are subject to change without notice. With current market conditions we can't guarantee future pricing, however placing a qualifying stocking order will lock you into the preferred price level until 3/16/2019. Please visit **www.carrierenterprise.com** for your most current pricing, availability and to place orders.
- Equipment and refrigerant do not count toward the dollar value of the order for the OEM/Factory Authorized Parts Level and Pre-Season terms do not apply, even if listed in the book. However, we will ship them free freight with your program order.
- Terms and free freight will apply to any back-ordered item.
- All orders/terms are subject to credit approval.
- Not responsible for errors or omissions. Prices subject to change without prior notice.
- Pre-Season orders will exempt non-dealers from warranty processing fees.
- Pricing based on quantity "each" cost, unless otherwise stated. *Comfort Products Distributing intends to hold this published pricing through the listed dates, however, cost fluctuations may cause unexpected price changes to our customers.*

^A CSA rating for altitudes to 2000 ft.

^B Size shown is for gas connection to a single stage gas valve, not supply line size.

^C Smaller or larger vent pipe diameters may be allowed; refer to the Venting Installation Manual, Form I-V-PV. If vent diameter is different from vent connection, reducer/enlargers will be field-required.

^D MODP = 2.25 x (largest motor FLA) + smallest motor FLA. Answer is rounded to the nearest commercially available circuit breaker.

^E All other information in this table is based on a heater equipped with a standard 115 volt open fan motor.
