

2020 Ductless/VRF Training Schedule

Carrier Enterprise, Florida Region is Your Master Distributor for these great brands and more.

Technical Training classes are open to all licensed contractors, institutional maintenance organizations and their HVAC trade employees.

Any cancellations of registered students is required 72 hours prior to class date or company will be billed for attendance.

All courses require a minimum of 10 students to hold class. CE Florida reserves the right to cancel classes when this minimum number has not registered no later than the Thursday prior to the scheduled course date.

Course fees will be waived for any students currently enrolled in an ACCA or other NON-PROFIT HVAC Trade School and for any Public School Systems HVAC Service Personnel. (Maximum of 4 per class)

Company Specific Classes are also available at a group rate and require scheduling 3 to 4 weeks in advance and are subject to trainer availability.

Qualifies for 4 Hours of FAD Dealer Training Certificate for all Carrier & Bryant Dealers.

Registration form is required for all attendees.

CE FL Ductless Course Description:

This 4 hour class qualifies for FAD credit and will be a Complete Overview of our Carrier Ductless Systems Line-up. This class is intended for Technicians and Sales Personnel that would like a better understanding of the Carrier Ductless Line. We will cover:

- Options
- Features and Benefits
- Installation
- Maintenance

Service and Trouble-Shooting Attendees will become familiar with the standard features of the equipment, available accessories and their individual application. During the course, participants will learn proper application requirements as well as appropriate installation practices.

The instructor will also discuss, and participants will have a chance to learn, troubleshooting techniques required to increase their ability to correctly diagnose system related problems during the presentation.

With class discussion and handout material provided during the training, Technicians and Sales Personnel will have a greater understanding of this equipment's features/capabilities and learn why the Carrier Ductless line-up is above the rest!

CE FL VRF Course Description

This 4 hour class will be a high-level overview of our Toshiba/Carrier Variable Refrigerant Flow (VRF) systems. This class is intended for Technicians and Sales Personnel that would like a better understanding of the Toshiba/Carrier VRF Line. We will cover:

- Application
- Load Calculations
- Design/Build & Quoting
- Installation
- Maintenance
- Service & Troubleshooting.

Attendees will become familiar with the standard features of the equipment, available accessories and their individual application. During the course, participants will learn proper application requirements as well as appropriate installation practices.

The instructor will also discuss, and participants will have a chance to learn, troubleshooting techniques required to increase their ability to correctly diagnose system related problems. After completing this course, Technicians and Sales Personnel will have a greater understanding of this equipment's remarkable features and capabilities and learn why the Toshiba/Carrier VRF line is above the rest!

CE TX Carrollton Courses

CE TX Carrollton Courses are advanced and all attendee's must have first completed the CE FL local courses within the past 18 Months before attending these classes.
