Innovation at It's Finest

- The Water Savor™ Controller saves a minimum of 50% water used by your humidifier, but six settings allow customization for maximum water savings of up to 96%!

Water Facts

- While the earth's population continues to grow at record rates, the overall amount of water on the earth has not changed for over 2 billion years.¹ Clearly, water is not a limitless resource; yet the demand for water steadily grows.
- Less than 1% of the earth's water can be used as a drinking source.²
- Conserving water is not only essential to our wellbeing, but also has financial benefits.
- Water rates in Canada rose 58% over a 5-year period ending in 2007⁴. Rates have risen 25% in 30 major cities of the USA since 2010;³ a trend that continues.
- Installing a humidifier with the Water Savor™ Controller is a great way to reduce water waste and save money, *without* changing your lifestyle or comfort!
