### Quick Operating Procedure:

1. Pull back the sliding sleeve until it locks into position → The clamping jaws are now open.
2. Place Clickmate onto Schrader valve thread and push sliding sleeve forward until it clicks and stops.
3. The clamping jaws are locked and the stop valve is opened → Refrigerant filling can now begin.
4. Once done, pull sleeve back to remove Clickmate → Stop valve is closed and jaws are opened.

***Wear and tear/maintenance of O-rings (Part Nr. E50-051S720) are not covered under warranty.***  
***Please refer operating instructions at [www.weh.us/TW111](http://www.weh.us/TW111)***
