## DESCRIPTION

The Ductmate TDF® Cornermatic stainless steel corner is manufactured for use with transverse duct connection systems that are rolled directly onto the edge of the duct.

## BASIC USE

Cornermatic corners are used on TDF ductwork to complete a flange connection.

## FEATURES

- Available in 304SS or 316SS
- Precision stamped from 16 gauge Stainless Steel
- Manufactured to very strict tolerances
- 100% Union made in USA
- Corners can be manually inserted or can be used in TDF corner-inserting machinery
- Hole for a 3/8" Carriage Bolt

## TECHNICAL INFORMATION

Product No. CMFS4 (304SS) or CMFS6 (316SS)
