Submittal Form The Stripper™ Spray Maintenance System

DESCRIPTION

Galvanizing build-up is bad for roll forming equipment, production efficiency, and profits. The Stripper is a degalvanizing agent that strips your machine of messy build up. It sprays on red for easy visibility. Simply Spray it on rollers of forming machines and press dies and the special ingredients get right to work releasing and removing galvanized build up. Then high quality lubricants take over to keep precision machines running smoothly...at peak efficiency... day in, day out.

TYPICAL PROPERTIES

- Type:** Aerosol
- Color:** Red
- Odor:** Mild solvent
- Spray Pattern:** Coarse mist
- Active Ingredient:** Base oil solvent
- VOC:** Less than 50% by weight
- Flammability:** Flammable liquid and vapor
- Storage Life:** 1 year. Do not store in direct sunlight.

APPLICATION

Temperature: 60°F to 90°F (15.5°C to 32.2°C). Keep at 70°F for optimum performance. If canister temperature falls below 70°F, move it to a warm area until optimum performance is achieved.

Preparation: Clean object or surface thoroughly

Method: Keeps rolls, dies, punching, searing and notching blades operating freely. Prevents galvanization build-up and cleans lubricating rollers, chains, etc.

Clean up: Mineral spirits

PRECAUTIONS

Flammable Liquid and vapor. Keep away from open flame. Do not expose to heat or store above 120°F.
