

Quik-Twists

Wood

Steel

When preparing to suspend HVAC equipment, ductwork or accessories, threaded anchor points are often required. Quik-Twists from Duro Dyne are side or vertical mounted fasteners that provide attachment points for steel threaded rods and other assemblies. There are two variations of Quik-Twists; one for penetrating and threading into steel and one for wood. Each Quik-Twist has a 3/8"-16 threaded hole in the fastener's hex shaped head. Side mounted Quik-Twists have the threaded hole perpendicular to the fastener shaft and passing completely through the fastener head. Vertical mounted Quik-Twists have the threaded hole parallel to the fastener shaft and as deep as the fastener head.

- No pilot hole is needed for Quik-Twists
- All fasteners are zinc plated for corrosion resistance
- Chucks sold separately for easy installation

Quik-Twist Ordering Information			
Item #	Code	Description	Packaged
30224	SHW38-25	3/8" x 2" Wood Side Quik-Twist	25/Ctn.
30226	VHW38-25	3/8" x 2" Wood Vertical Quik-Twist	25/Ctn.
