

**NOW COMPATIBLE WITH 1 or 2-STAGE A/C AND HEAT PUMPS\* (DUAL FUEL)!!**

**(\* ONLY COMPATIBLE WITH UNITS THAT ENERGIZE THE REVERSING VALVE IN THE COOLING MODE)**

## **VHBXB-HW Series**

**Variable Speed**

**1.5 - 5.0 Tons Cooling**

**Up to 132,400 BTUH Hot Water Heating  
Without HW Pump**

In addition to all the popular features of its sister product (the HBXB-HW Series), the **VHBXB-HW** series includes a programmable, high efficiency motor that redefines comfort and energy savings. The **VHBXB-HW** motor automatically adjusts its torque and speed to maintain a preprogrammed level of constant airflow over a wide range of external static pressures. This variable speed technology offers better indoor air quality, more precise humidity control, quieter operation, consistent indoor air temperature, and lower utility bills.

**High Efficiency** - At full load conditions the **VHBXB-HW** motor is 20% more efficient than an induction motor and at constant fan speed it consumes only 60-80 watts of power compared to 400 watts for a standard induction motor. In addition, the **VHBXB-HW** includes a high efficiency "A" coil with factory installed TXV for precise refrigerant control.

**(1) First Co's customer is ultimately responsible for confirming which fan coil models are compatible with selected outdoor unit(s) and which expansion valves (if any) are required. to determine certified indoor/outdoor matches, go to: [www.firstco.com](http://www.firstco.com) or contact the factory.**

**Quiet Operation** - The versatile **VHBXB-HW** motor quietly "ramps up" when the unit is turned on and "ramps down" when the thermostat is satisfied, eliminating the annoying sounds of changing airflow.

**Self-Regulating Constant Airflow** - The **VHBXB-HW** motor is factory programmed to maintain a predetermined level of airflow over a wide range of external static pressures, ensuring optimum system performance and whole-house comfort. The benefits of constant fan operation are:

- **Consistent air distribution** (and temperature) throughout the home
- **Better indoor air quality** (further improved with the addition of a high efficiency filter) - This allows the air to be filtered without excessive drafts and without sacrificing efficiency.
- **Better humidity control** - The **VHBXB-HW** is designed to extract much more moisture from the air than a conventional system by slowing the airflow over the cooling coil. The result is an improved summer comfort level at higher indoor temperature.

#### **Additional Standard Features:**

- Factory installed R22 or R410A TXV (non-bleed type)
- Blower door safety switch (except 48/60VHBXB-HW)
- Convenient connections for boiler or switching relay
- Hot water coil assembly slides out for easier service
- Manual air vent on hot water coil
- Attractive baked-on powder coat finish
- Fully insulated cabinet
- Primary and secondary drain connections on cooling coil
- Optional hot water coil freeze protector
- Upflow / Horizontal drain pans
- Higher efficiency pleated filter
- Compatible with most properly sized and installed zone control systems. Contact the zone control manufacturer.

For additional sales and technical information on variable speed motors, visit [www.thedealertools.com](http://www.thedealertools.com)

Digital thermostats for these units must have a "C" terminal.

**NOTES:**

- (1) Heat BTU is at 65° Entering Air Temperature.
- (2) 190° EWT would increase the 180° EWT heating capacities by 9.1%. 200° EWT would increase the 180° EWT heating capacities by 18.2%.

Airflow shown are at standard air conditions, dry coil at 240 volts.  
Max. ext. static pressure is 0.50" wtr

**NOTES:**

- The cooling and heating speed taps are factory set on "A".
- The delay profile is factory set on "A" (Arid setting).
- The adjust profile is factory set on "Normal:"
- Adjust profile (+) will increase airflow by 10%, while tap (-) will decrease airflow by 10%
