

INSTALL ONE OF THESE AND THERE'S ONLY ONE MORE THING TO DO. FORGET ALL ABOUT IT.

[HYDRONIC EXPANSION TANKS WITH 100% BUTYL DIAPHRAGMS]

16-gauge solid steel tank, finished with highest quality urethane paint to stand up to the dampest basement or crawl space.

100% pressure tested and backed with a 5 year limited warranty.

Steel nipple designed to stand up to the dampest basement or crawl space.

Diaphragm is constructed of 100% butyl rubber.

Out of sight, out of mind.

FLEX 2 PRO HTX and SXHT series designed for larger heating systems will put you at ease.

Constructed of the highest quality steel, the HTX and SXHT are true work horses. HTX comes standard with a 100% butyl diaphragm. SXHT goes even one step further with our patented CAD-2 diaphragm, offering even lower permeability rates at higher temperatures.

CONTROLLED ACTION DIAPHRAGM MAXIMIZES DRAWDOWN & ELIMINATES CHAFING

Additionally, both tank lines' diaphragms are oversized, which maximizes drawdown and minimizes wear. This design feature virtually eliminates diaphragm stretch, further promoting longevity.

Combination packages including tank, air scoop, and vent for added installer convenience, and Hydronic accessory items including a fill valve, are also available.

So use an HTX or SXHT for your next system installation—and then, forget all about it.
