

Safety Data Sheet Exemption

This statement will notify you that air filtration products manufactured or imported by Glasfloss Industries are an "Article" under the OSHA Hazard Communication Standard and, as such, is exempt from the provisions of the standard. (Please see the explanation of the exemption below.) Safety Data Sheets are required to be furnished by suppliers under various Federal and State statutes and regulations for substances, materials or products that are deemed to be hazardous. Air filtration products are not deemed to be hazardous products. We, therefore submit this statement in lieu of a Safety Data Sheet.

The Occupational Safety and Health Administration's Hazard Communication Standard requires Material Safety Data Sheets be furnished for substances, materials or products which are deemed to be hazardous products. Section 1910.1200 (b) (6) (v) of the standard exempts "Articles." According to the definitions and interpretations in Part C of the above reference, an "Article" means a manufactured item other than a fluid or particle:

- i. Which is formed to a specific shape or design during manufacture,
- ii. Which has end use function(s) dependent in whole or part upon its shape or design during end use; and
- iii. Which under normal conditions of use does not release more than very small quantities, *e.g.*, minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

All air filtration products manufactured or imported by Glasfloss Industries are formed to specific shapes or design during manufacture; have end use function(s) dependent in whole or part upon their shapes and design during end use; and do not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use. Thus air filtration products manufactured or imported by Glasfloss Industries are an "Article" as defined by the standard, and are exempt from the requirements for Safety Data Sheets. The statement provided above is offered for all air filtration products manufactured or imported by Glasfloss Industries in lieu of a Safety Data Sheet for your records required for compliance with the OSHA Hazard Communication Standard and State Right-to-Know Requirements.

Should any additional information or assistance be required, please call 214.741.7056 and ask for the Glasfloss Safety Department.

Glen Jewett
Safety Director
