PRODUCT FEATURES

PUT COMFORT ON CRUISE CONTROL

Sophisticated, electronic control systems detect any change in room or zone temperature and—like a car's cruise control—automatically adjust the speed of the outdoor unit's INVERTER-driven compressor for precise capacity and temperature control. Electronic LEVs exactly control refrigerant flow to regulate coil temperature.

INVERTER TECHNOLOGY

DETECT AND CONTROL TEMPERATURE FLUCTUATIONS

All M-Series systems detect room temperature fluctuations and automatically adjust performance for ultimate comfort in any room.

- All indoor models feature a return air sensor that constantly monitors and maintains room temperature
- Continuous fan operation ensures temperature consistency
- Systems with an i-see Sensor[™] scan the room and adjust airflow based on ambient temperature readings (MSZ-FE09/12NA i-see Sensor models only)
- Auto changeover feature automatically switches between cooling and heating modes as needed to maintain a consistent temperature – just set it and forget it (MUZ and SUZ outdoor units)
- Seven horizontal airflow directions provide 150° of lateral airflow for greater conditioned air circulation (wide vane or swing mode, available on the MSY(Z)-FE09/12/18/GE24/D30/36NA)

PROGRAMMABLE COMFORT

Mitsubishi Electric offers a comprehensive family of controllers that can adjust temperature, fan speed, and more.

 SMART SET: Programs multiple settings into one quick-press feature. Programs heating set back

Our indoor units use a sophisticated multi-part filtration system to reduce contaminants such as allergens, viruses and bacteria from the air. This combination of filters provides a healthier, breathing environment for the home.

HYBRID CATECHIN PRE-FILTER:

- Captures dust particles and absorbs odor-causing gases
- Hybrid-coating process makes the catechin filter washable and, if properly maintained with regular cleaning, remains effective for up to ten years

PLATINUM CATALYST DEODORIZING FILTER:

AVAILABLE ON MSZ-FE9/12NA

- Features a ceramic surface absorption element and uses nanotechnology for high-power odor absorption
- Periodic cleaning, following the recommended procedures, will maintain filter effectiveness for up to two years

8 BLUE-ENZYME ANTI-ALLERGEN FILTER:

AVAILABLE ON MSZ-FE9/12NA

- Reduces germs, bacteria, and viruses
- Helps trap dust, pollens, mites, and other particles
- Utilizes an enzyme catalyst to help break down the sulfur atom bonds in allergen proteins, transforming them into nonallergen proteins, and, effectively cleaning the air (filter should be cleaned regularly to maintain effectiveness)

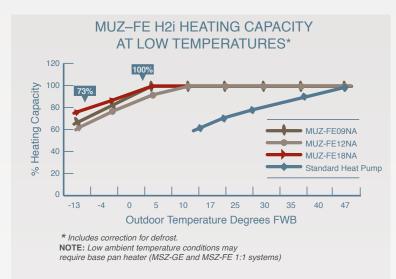

Complementing the innovative INVERTER-driven compressor, the MSZ-FE high-efficiency systems feature special technology for delivering exceptional heating performance.

H2i® TECHNOLOGY

HEATING even when it's -13° F outdoor ambient, producing up to 100% heating capacity at 5° F (MSZ-FE09/18) and 92% capacity at 5° F for MSZ-FE12

YEAR-ROUND COMFORT in extreme climates without the need for energy-consuming indoor supplemental heating devices

HOT-START TECHNOLOGY provides warmth from the start, reducing drafts

MINIMAL MAINTENANCE thanks to easily accessible filters, little or no ductwork to clean, and simple wiring between the indoor and outdoor units

QUIETER THAN A HUMAN WHISPER.

Do you hear that? No? Mitsubishi Electric systems operate at low sound levels. Our indoor units produce decibels barely at a whisper level. Compare to other common sounds:

Ambulance siren	120 decibels
Circular saw	110 decibels
Vacuum cleaner	80 decibels
Normal conversation	60 decibels
Whisper	30 decibels
Our indoor units	19-34 decibels*

Did you hear that? We hope you did.
