SINCE 1914, WE'VE BEEN DELIVERING ON OUR PROMISE TO CREATE SENSIBLE, AFFORDABLE PRODUCTS THAT DO WHAT YOU NEED THEM TO WHEN YOU NEED THEM TO. BECAUSE THE BOTTOM LINE IS YOU JUST NEED A FURNACE – AN APPLIANCE TO HEAT YOUR HOME WITH GREAT EFFICIENCY. HOMEOWNERS WHO CHOOSE A PAYNE® ULTRA-LOW NO<sub>x</sub> GAS FURNACE ARE DELIGHTED IN THEIR DECISION BECAUSE IT IS SUCH A SENSIBLE CHOICE THAT KEEPS PERFORMING WINTER AFTER WINTER.

*Right for you.*

## OUR PROMISES

### *The Well-Built Warranty.*

Every ultra-low NOx gas furnace we build is covered with a 10-year parts limited warranty to the original owner of the properly registered product.\* The heat exchanger is covered by a 20-year parts limited warranty.

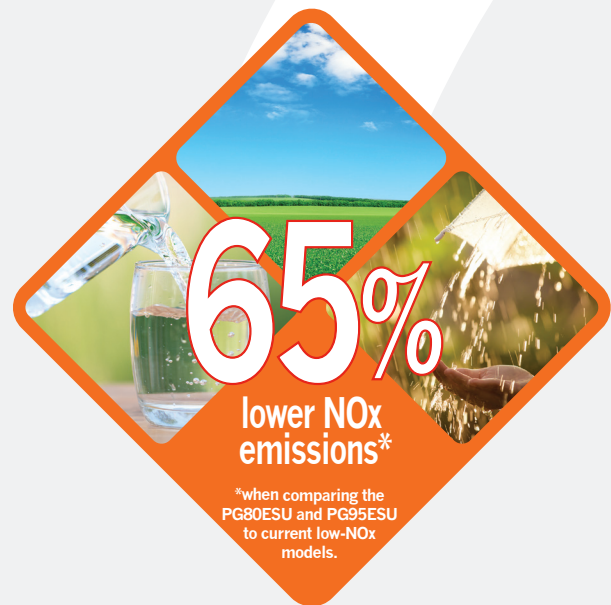

### *Run-tested and Right for You.*

Because we only feel comfortable providing you with long-lasting comfort and efficiency, only products that complete our testing with a 100% success rate make it out of the factory.

## RAISING THE BAR

*The Payne® PG80ESU and PG95ESU Ultra-low NOx Gas Furnaces deliver warm, winter comfort with 65% lower nitrogen oxides (NOx) emissions compared to current low NOx models. NOx contributes to the formation of smog and acid rain and the deterioration of water quality. For homeowners passionate about preserving a better environment, a Payne ultra-low NOx gas furnace is the right choice.*

*A versatile addition to any home, a Payne® ultra-low NOx gas furnace can be matched with a Payne® air conditioner for a traditional, year-round heating and cooling system. Or, you can create a dual-fuel system by matching it with a compatible thermostat and Payne® heat pump. A dual-fuel system maximizes heating efficiency by taking advantage of the most energy-efficient fuel source for heating, then switching as needed when conditions change.*

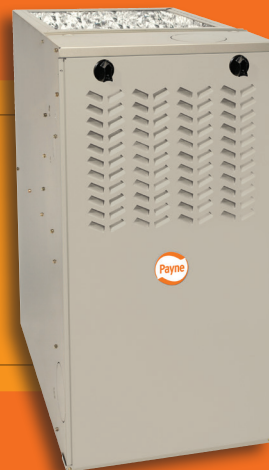

## PEACE OF MIND

*When you purchase Payne® products, you will soon find out why they are right for you. Our ultra-low NOx gas furnaces aren't just an option for meeting new emissions standards — they're built to perform.*

- 1 Efficiency that Lasts** — Our PG80ESU 80% AFUE ultra-low NOx gas furnace saves money on operation compared to older, less-efficient models. For even greater savings, the PG95ESU delivers up to 95% AFUE gas efficiency. And we stand behind our reliable performance, season after season. The stainless steel heat exchanger, for example, is specially designed for lasting corrosion resistance and durability and is backed by a 20-year parts limited warranty.
- 2 Reliability** — The hot surface igniter makes sure you can count on heating when you need it.
- 3 Precise Comfort** — Our multi-speed ECM blower motor allows for customized airflow throughout the home. Because no two homes are alike, this flexibility is the key to maximizing comfort while also reducing energy consumption through the efficient motor.
- 4 Safety** — Our blocked vent protection on the PG80ESU shuts down furnace operation when it detects common vent obstructions. This important safety feature keeps potentially harmful flue gases away from your living areas.

## OUR ULTRA-LOW NOx GAS FURNACES

- Energy efficient, ECM motor
- Multi-poise installation
- Ultra-low NOx California model

PG80ESU

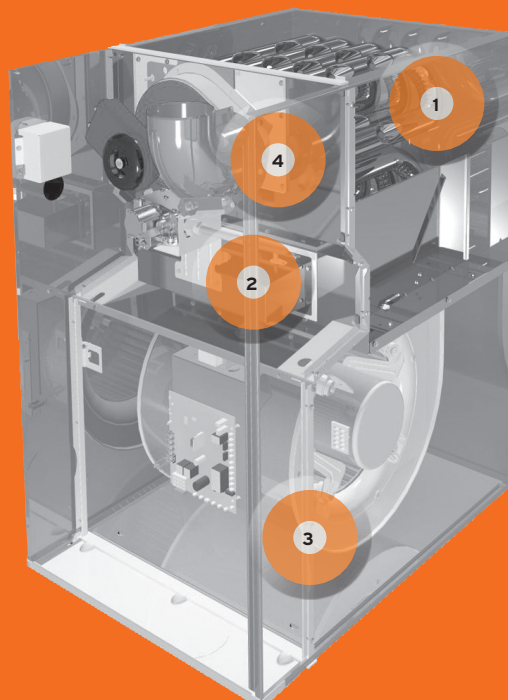

80%
