- Prevent pests, & debris from entering vent
- Connects to PVC fitting for flush installation
- No gluing Necessary!
- Slotted channel allows for condensation drainage preventing buildup & freezing
- High Grade Type 304 Stainless Steel Screen

TOP QUALITY

Termination Vent Screens

RAVEN
SPECIALTY PRODUCTS

Raven Pipe Vent Screens are professionally made to prevent unwanted animals, debris, and leaves from entering plumbing and HVAC vent pipes. Fabricated with schedule 40 PVC and high Grade Type 304 Stainless Steel Screen. The vent cap works excellent as a condensate trap screen and as well as a vent stack guard. Ideal for use on high efficiency heating equipment. No tools or glue is required for assembly. Simply press the vent screen into an existing fitting to seal out pests and unwanted debris. The patented condensate channel allows for proper drainage that prevents a buildup of debris and moisture, preventing freezing of screen.

Available in 4 Sizes • Stainless Steel Screen

PART #	SIZE	INNER	MASTER
TVS2SS	2"	1	100
