

Sensibo Inside for air conditioners

FEATURES

Contact: support@sensibo.com

Meet Sensibo.

Sensibo is a technology that makes air conditioners connected and smart

Sensibo supports these models

MAQ, MBD, MBC, MBF

High wall split, ducted, cassette and floor units

Highlights

Cools and heats your home before you arrive

Turn off the AC when the last person leaves

Saves energy and reduces your electricity bill

Monitor the temperature remotely

Create 7 day scheduling

Control your A/C from anywhere

Control your air conditioner from anywhere

Control your air conditioner

Sensibo is the ultimate device to control your air conditioner and heat pump and make it smart. With Sensibo you will be able to control, monitor, automate and save energy. In one app control many devices, and share your devices with your family at home and colleagues in the office.

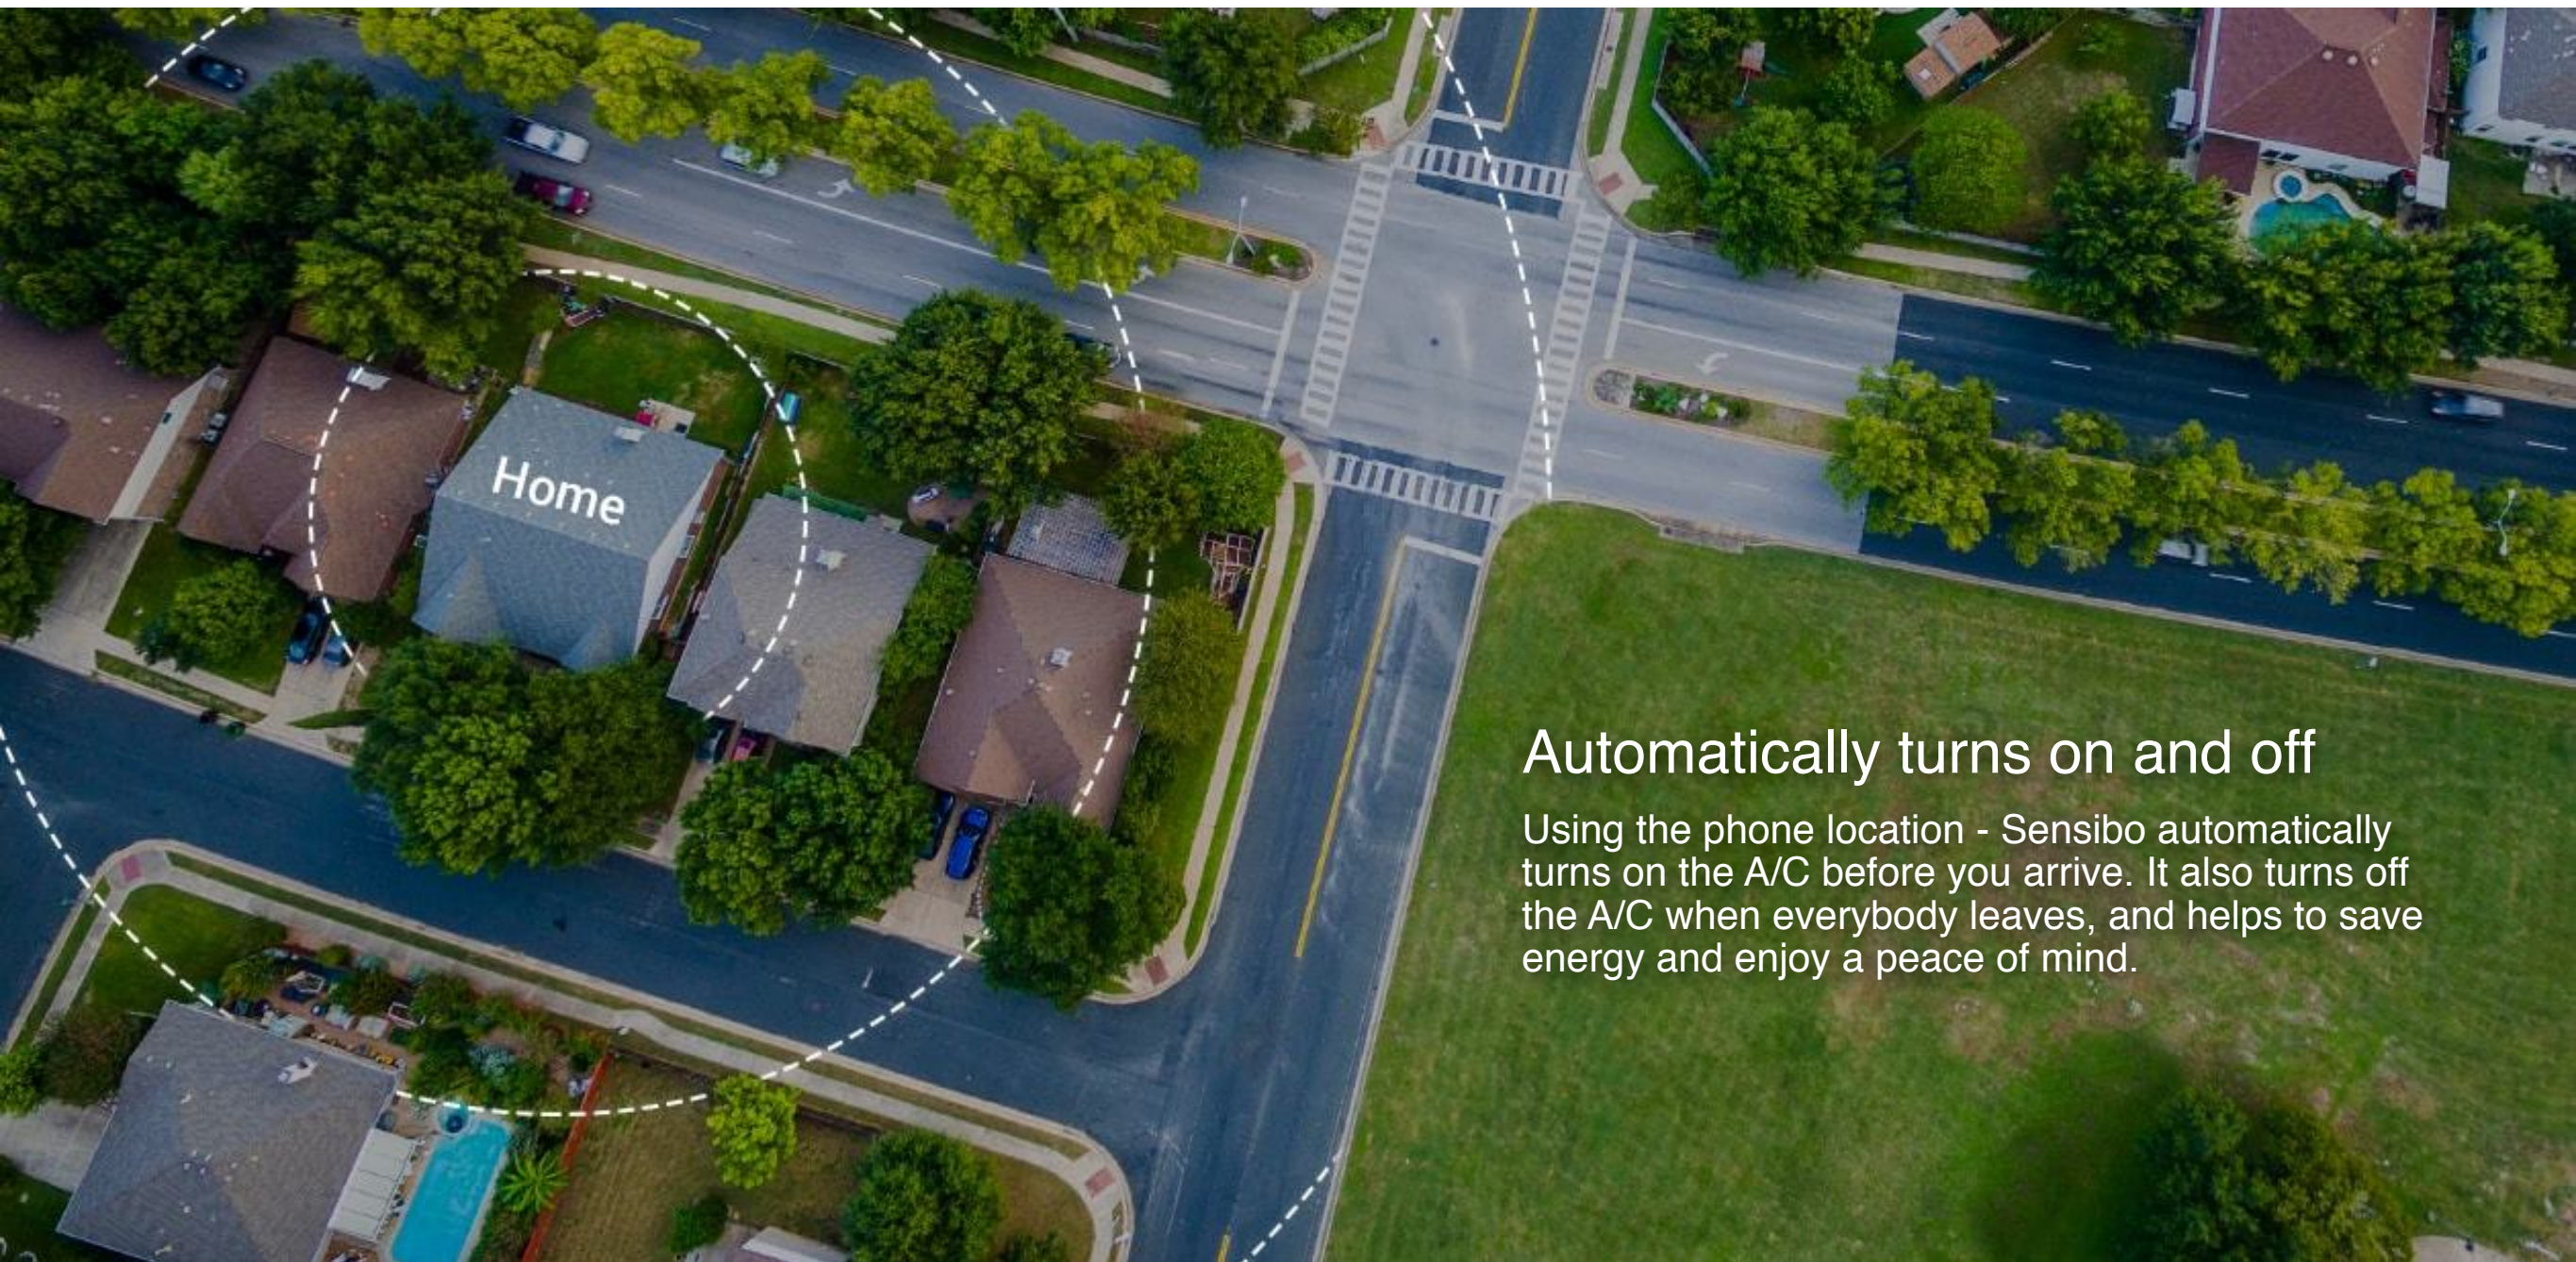

Unlimited 7-day scheduling

7-day scheduling

Unlimited 7-day scheduling lets you finally be in control of your climate. Define as many schedules as you'd like: warm the house when you wake up in the morning, turn off the A/Cs automatically after you go to sleep, and explore endless other possibilities.

Geofencing: automatic on and off

Automatically turns on and off

Using the phone location - Sensibo automatically turns on the A/C before you arrive. It also turns off the A/C when everybody leaves, and helps to save energy and enjoy a peace of mind.

Share with your family

Share with your family

Sensibo can be shared with your family at home, and with you colleagues at work. Let anyone enjoy the benefits of your smart A/C.

Supports Amazon Echo & Google Home

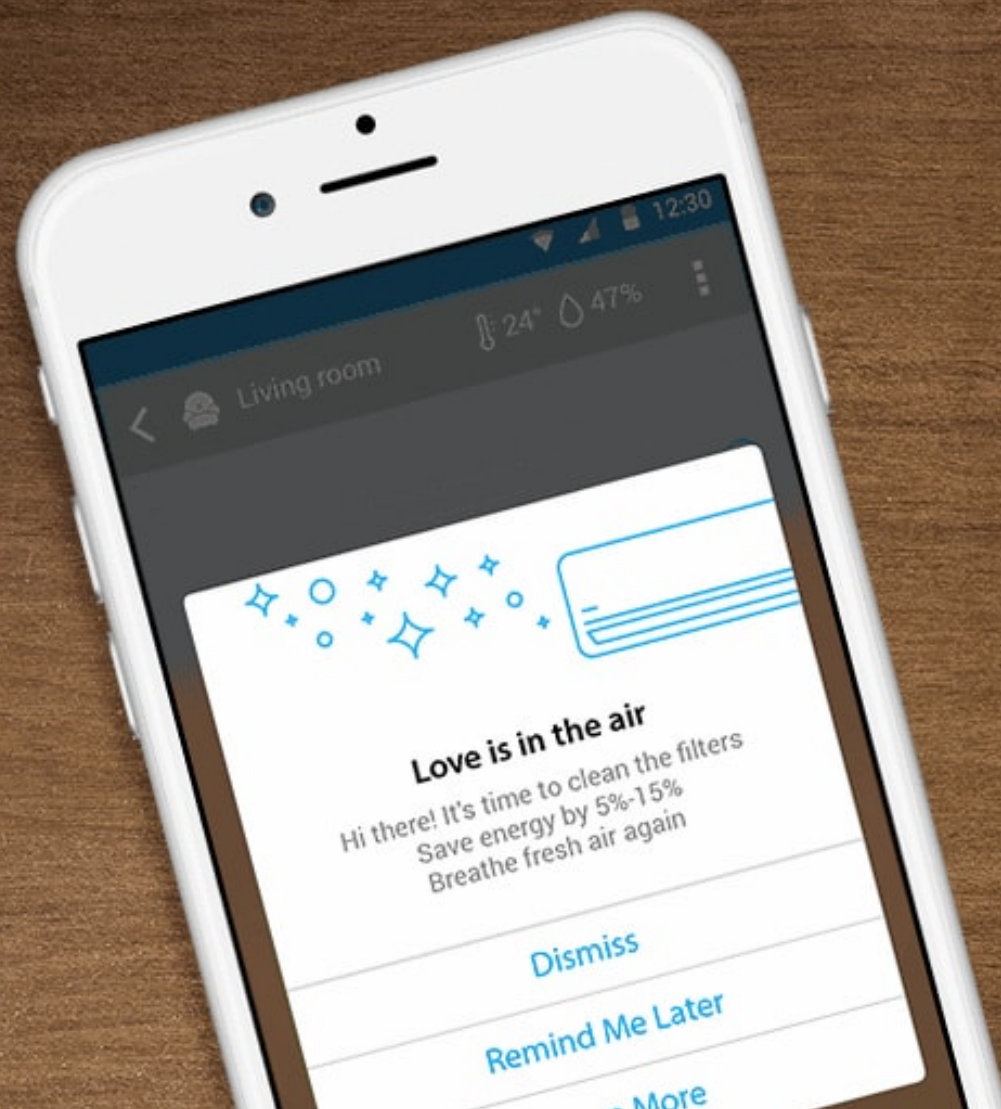

Command your unit with you voice

Just one click to link Sensibo to your Amazon or Google assistant and you're set to go. Control the temperature with your voice with no need to take the phone out of your pocket.

With Sensibo you can use phrases like: 'Alexa, turn on living room' and 'Ok Google, ask smart AC to turn off the bedroom AC'.

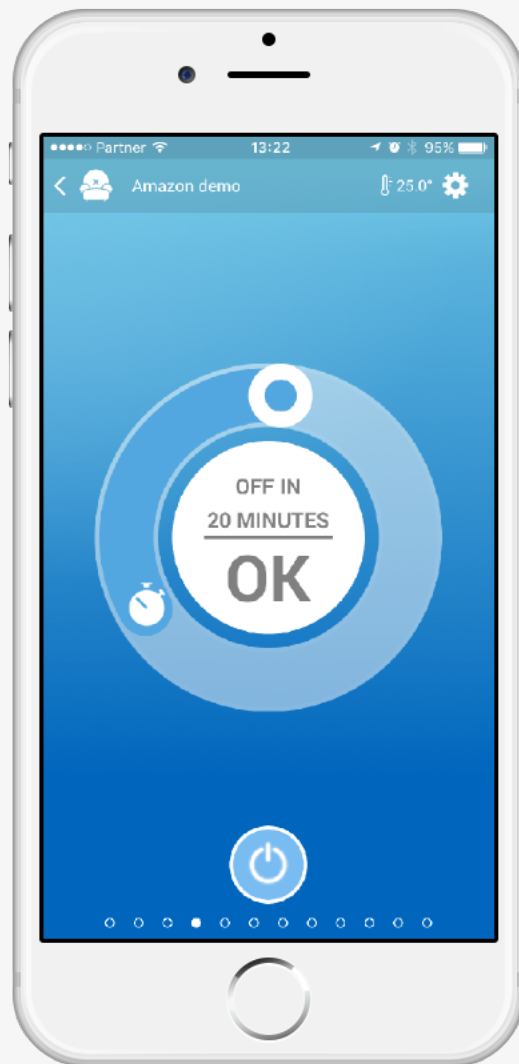

Filter cleaning reminders

Sensibo will remind you to clean the filters

Based on your specific usage of the unit, Sensibo will pop up a reminder to let you know it's time to clean up the filters to save energy and make the air you breathe cleaner.

Use timers

Quickly set on/off timers

With the timer feature you can easily and quickly set a timer to turn on or off the AC unit as desired. For instance, turn it off 30 minutes after going to sleep, or set it to turn on when you go for a run.

Climate React

Use advanced features with Climate React

You can set up dual set point, anti freeze (and heat protection), and set up thermostat mode using the Climate React feature.

Set up Climate React (beta) for support desk

32°

68°

84°

140°

When temperature goes below 68° then

Set AC State to

Heat to 70° low

When temperature goes above 84° then

Set AC State to

Cool to 64° high

CANCEL

APPLY

You can still use your remote

Sensibo keeps in sync with your remote

Whenever you use the remote, Sensibo will sync the app to show you the current state of the unit.
