Indoor Air Quality

Air Bear[®] Media Whole House Air Cleaners

Media Air Cleaners

Is your home's air a danger to your family?

EPA studies indicate that the air inside your home may contain up to 10 times more pollution as that outside your door. Indoor air pollution can irritate the eyes, nose, and throat, cause headaches, dizziness, and fatigue as well as aggravate asthmatic and allergic conditions.

The average central forced heat or air conditioning system typically performs some form of air cleaning; such systems only capture large particles and are not efficient enough to catch microscopic airborne pollutants and particles. TRION® media air cleaners are rated at MERV 8, MERV 11 and MERV 13 filtration standards to eliminate airborne pollutants. The American Lung Association® and the EPA® both recommend reducing indoor air pollution to improve health; a TRION® media air cleaner can help.

Dirty air does not just harm the health of your home's inhabitants, it is also harmful to your heating or air conditioning equipment. Dirty air particles stick to the internal components of the system and damage internal motors and fans, causing poor heat and cooling transfer on the system's components. In addition to the benefits of breathing clean air, TRION® media air cleaners keep your system clean and operating at constant peak energy efficiency.

Pollutant Facts

- 350 Million particles of pollutants are inhaled everyday - which is equivalent to 2 teaspoons.
- 50 Million Americans suffer from allergies.
- 20 Million Americans suffer from asthma.
- 6 Billion dollars each year are spent on treating respiratory problems.
- Poor ventilation accounts for more than half of all indoor air quality problems.

Air Bear® Whole House Air Cleaners

TRION® air cleaners feature media filters that effectively capture large and small airborne pollutants to MERV 8 or MERV 11 filtration standards. High-efficiency media air cleaners can clean large amounts of air while offering whisper-quiet operation. The TRION® Air Bear® line of ducted media air cleaners easily attach to your home's existing or new heating and cooling unit.

TRION® Air Bear® Supreme, Air Bear® Right Angle and Air Bear® Cub media air cleaners offer outstanding performance, effectively removing mold spores, pollen, and other airborne contaminants. Using highly efficient, omni-directional, synthetic material and an extended surface-pleat filter design, the Air Bear® media filters have been proven to have a higher dirt holding capacity than competitive filters and are over 10 times more efficient than traditional 1" throw-away filters.

The Air Bear® Supreme and Air Bear® Cub are both one-piece wrap around, 20-gauge cabinets. The Air Bear® Right Angle space-saving design is ideal for installation situations that require a 90° duct adapter. Air Bear® media air cleaners are available in 5 cabinet sizes, 2 filter efficiencies (MERV 8 and MERV 11), and 3 airflow capacities (up to 1,200, 1,400, and 2,000 cubic feet per minute - CFM). Also available for all models (except the Air Bear Right Angle) are an optional washable, removable pre-filter for large particles and an optional charcoal after-filter that removes common household odors such as pet and smoke odors.

How It Works

The air cleaner is mounted directly to the home's heating and cooling system. A high efficiency Air Bear® media filter captures the smaller, invisible particles that are present in your home's air. Air Bear® outperforms the competition because of its highly efficient synthetic material, radial pleating and an omni-directional airflow design. It has been proven to have a higher dirt holding capacity than competitive filters. That means fewer filter changes and money in your pocket!

Installation Methods

TRION® media air cleaners work within all types of heating and cooling system configurations. TRION® whole-house air cleaners can be easily installed and are suitable for use with all types of central forced-air heating and cooling system configurations. These illustrations show you where the air cleaners should be installed in four common setups.

TRION® Media Air Cleaners come with a lifetime limited warranty.
