

Water Saber Pro

The WATER SABER PRO eliminates the need to take most Air Conditioners apart to backwash the coil. It connects to any standard garden hose. Then it simply slides through the openings in the top or bottom of the Air Conditioner. This is the FIRST tool on the market that can do this!

Feature List

- Made of High Quality 304 stainless steel, Tig welded by Americans, in America!
- The Debris Screen prevents spray nozzle clogging.
- High Quality water flow control valve with a swivel adapter allows you to rotate and aim the jet spray independent of the garden hose. No fighting to turn the whole hose!
- Powerful, 90 degree Spray Nozzle directs the jet spray through the coil, flushing all the contaminants out.
- Lifetime Manufacturer's Warranty

“Backwashing” is the right way to clean A/C Coils, opposite their normal airflow. This is the only proven way to see that all of the dirt is removed from the coil.
